## Summary

Dedicated and versatile Software Engineer with a strong foundation in Full-Stack Development. Possesses a deep understanding of C++ programming and a passion for web development. Thrives in collaborative environments, effectively leading teams and fostering cohesive work dynamics to achieve project milestones.

## Education

### JSS Academy of Technical Education, Noida

2021 – 2025

Bachelor of Technology, Computer Science and Engineering, CGPA: 8.522 (as of 3rd year)

Noida, Uttar Pradesh

### Avadh Collegiate

2019 – 2020

Senior Secondary Education, CBSC, 93.2%

Lucknow, Uttar Pradesh

## Experience

### FullStack Developer Intern

02 October 2024 – Present

ShipHere

Remote

- As a full-stack developer at ShipHere, I work on real-world projects covering both front-end and back-end. I design and develop user-friendly, responsive interfaces, creating seamless user experiences tailored to diverse client needs.

## Technical Skills

**Languages:** C, C++, HTML/CSS, JavaScript,

**Developer Tools:** VS Code, Git, GitHub

**Technologies/Frameworks:** ReactJS, NodeJS, ExpressJS, REST, Bootstrap, Tailwind CSS

**Database:** MongoDB, SQL

## Projects

### Real Estate Website | MongoDB, ExpressJS, ReactJS, NodeJS, Tailwind CSS

(Live)

- Developed a high-performance, responsive real estate web application using the MERN stack (MongoDB, Express.js, React.js, Node.js) and Tailwind CSS, optimizing user experience and enhancing platform functionality.
- Architected robust Node.js and Express.js back-end with MongoDB integration, enhancing authentication and API connectivity, boosting efficiency by 35% and reducing response time by 20%.
- Implemented key features such as property listing management, advanced sorting based on user preferences, and a contact landlord functionality, creating a comprehensive and user-friendly real estate platform.

### E-Commerce Website(Amazon Clone) | ReactJS, NodeJS, ExpressJS, MongoDB, Restful APIs

- Spearheaded the development of a full-stack Amazon clone website using the MERN stack.
- Designed and implemented secure user authentication and authorization mechanisms, facilitating login, logout, and registration functionalities for personalized user experiences.
- Developed robust RESTful APIs to handle critical operations including user authentication, detailed product management, and cart functionalities, enabling users to efficiently add or remove products from their carts.

### Portfolio Website | ReactJS, Tailwind CSS

(Live)

- Utilized ReactJS to build a dynamic and interactive portfolio website, showcasing modern web development practices.
- Created detailed project pages featuring descriptions, technology stacks, and direct links to live projects and GitHub repositories, demonstrating practical application of skills.
- Included sections for professional journey, educational background, technical skills, and work experience, providing a holistic view of qualifications and accomplishments.
