Noida, Uttar Pradesh

Avadh Collegiate

2019 – 2020

Senior Secondary Education, CBSC, 93.2%

Lucknow, Uttar Pradesh

Experience

Bharat Intern

July 2023 – August 2023

Frontend Developer Intern

Noida, Uttar Pradesh

- During my tenure at Bharat Intern as a Frontend Developer, I actively contributed to diverse projects, notably spearheading the development of a Netflix homepage clone and a user-friendly temperature converter website
- These experiences allowed me to further solidify my proficiency in HTML, CSS, JavaScript, and responsive web design, enriching my expertise in creating captivating and interactive web solutions.

Projects

MERN Real Estate Website Project | MongoDB, ExpressJS, ReactJS, NodeJs, Tailwind CSS

March 2024

- Designed and implemented the front-end interface using React.js, ensuring a responsive and intuitive user experience using tailwind CSS.
- Developed the back-end infrastructure with Node.js and Express.js, utilized MongoDB as the database system, handling data management, authentication, API integration, added functionality of adding and displaying property listings.

E-Commerce Website(Amazon Clone) | ReactJS, NodeJS, ExpressJS, MongoDB, Restful APIs

November 2023

- Spearheaded the development of a full-stack Amazon clone website using the MERN stack.
- Authenticated user login/registration system for personalized experiences.
- Created RESTful APIs to manage user authentication, detailed product information and cart functionalities.

ARYAVARTA | HTML, CSS, JavaScript, Google Maps, SVG Images

July 2023

- This website aims to create a online comprehensive platform that showcase the rich and diverse cultural tapestry of India.
- I served as the Team Leader for this collaborative project involving a team of six individuals. Together, we developed a website intended for the Smart India Hackathon (SIH). Despite the project not being selected for the event, the experience of leading this initiative was invaluable.

Weather Forecast Website | ReactJS, Weather API, Tailwind CSS

July 2023

- Developed a comprehensive weather forecast website, aiming to deliver accurate and user-friendly weather information to a diverse user base.
- Utilized API endpoints to retrieve weather details, including temperature, humidity, wind speed, and weather conditions for specified locations.

Technical Skills

Languages: C, C++, HTML/CSS, JavaScript, Tailwind CSS
